

Rawan Mohamed Gamal

Front-End Developer

Cairo, Egypt 01115447199 rawangamakl@gmail.com [LinkedIn](#) [GitHub](#)

Professional Summary

Highly skilled Front-End Developer with solid experience in building dynamic, responsive web applications using React, JavaScript, Tailwind CSS, and Redux. Proficient in state management (Redux & Context API), authentication flows using JWT and cookies, role-based access control, secure authentication systems, and REST API integration.

Experience

Frontend Developer Intern

February 2025 - Present

Web Masters

- Developed responsive, component-based web interfaces using React and Tailwind CSS
- Built secure authentication flows with JWT and cookies, including protected routes and session handling
- Designed and implemented customized Shopify and E-commerce websites
- Managed projects from concept to deployment, meeting client specifications
- Applied Git workflows in collaborative environments, managing branches, pull requests, and clean version control for production-level code

Education

Bachelor of Computer Science and Information

2021 - 2025

Tanta University

Key Projects

1. Gharsa - Agricultural Marketplace Platform (Graduation Project)

Technologies: React.js, Axios, JWT Authentication, Role-based Access Control

- Designed and developed a comprehensive web platform connecting farmers, traders, and buyers
- Created role-based dashboards for traders, buyers, and admins with custom features for each role
- Built a complete admin dashboard displaying data on orders, users, and product listings for platform management
- Implemented a trader panel allowing traders to upload products, enabling farmers to reach customers easily
- Integrated JWT authentication with cookies, including protected routes and role-based access control

Project was nominated in a national competition and reviewed by the ITI

2. AI Summarizer and Chatbot

Technologies: React, AI Integration (Google Gemini API), Netlify

- Developed an intelligent AI-powered application that summarizes text content and provides chatbot functionality
- Integrated machine learning capabilities to process and analyze user input for accurate summarization
- Built an interactive chatbot interface in React with chat history, loading states, and error handling
- Implemented responsive design and deployed on Netlify for optimal performance

3. E-commerce Website

Technologies: React, Tailwind CSS, Axios, Redux, Context API, Netlify

- Built a fully responsive, mobile-first UI using React and Tailwind CSS
- Implemented Axios for fetching and syncing product data from REST APIs with error handling and loading states
- Utilized Redux and Context API for managing cart, authentication, and UI state across pages
- Deployed application on Netlify with collaborative Git workflow
